We are

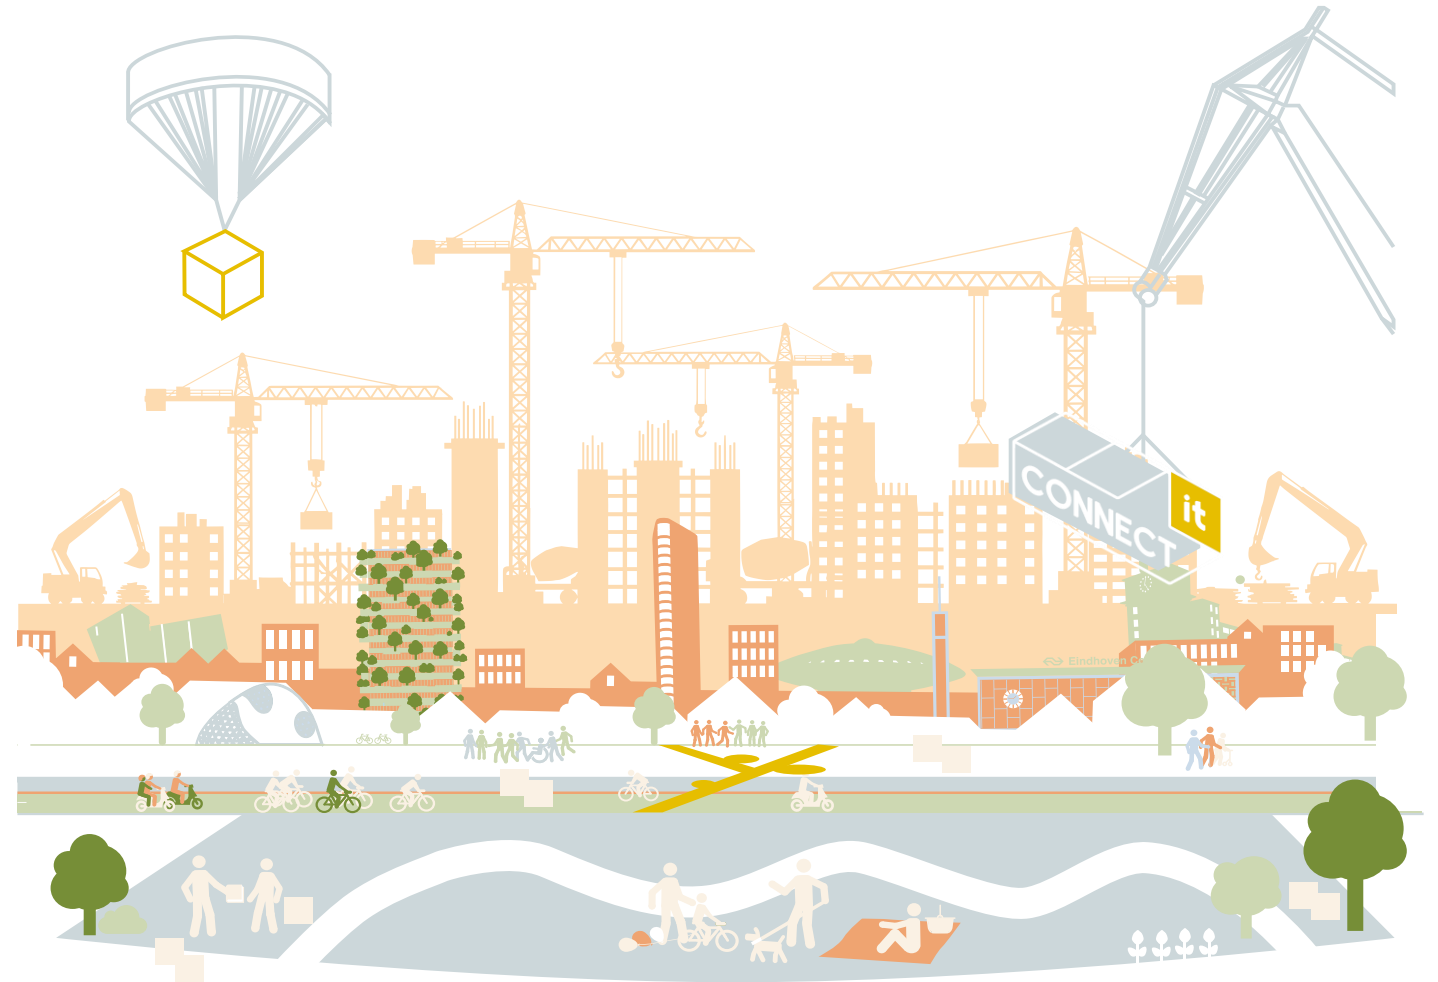

The Reality Eindhoven Faces

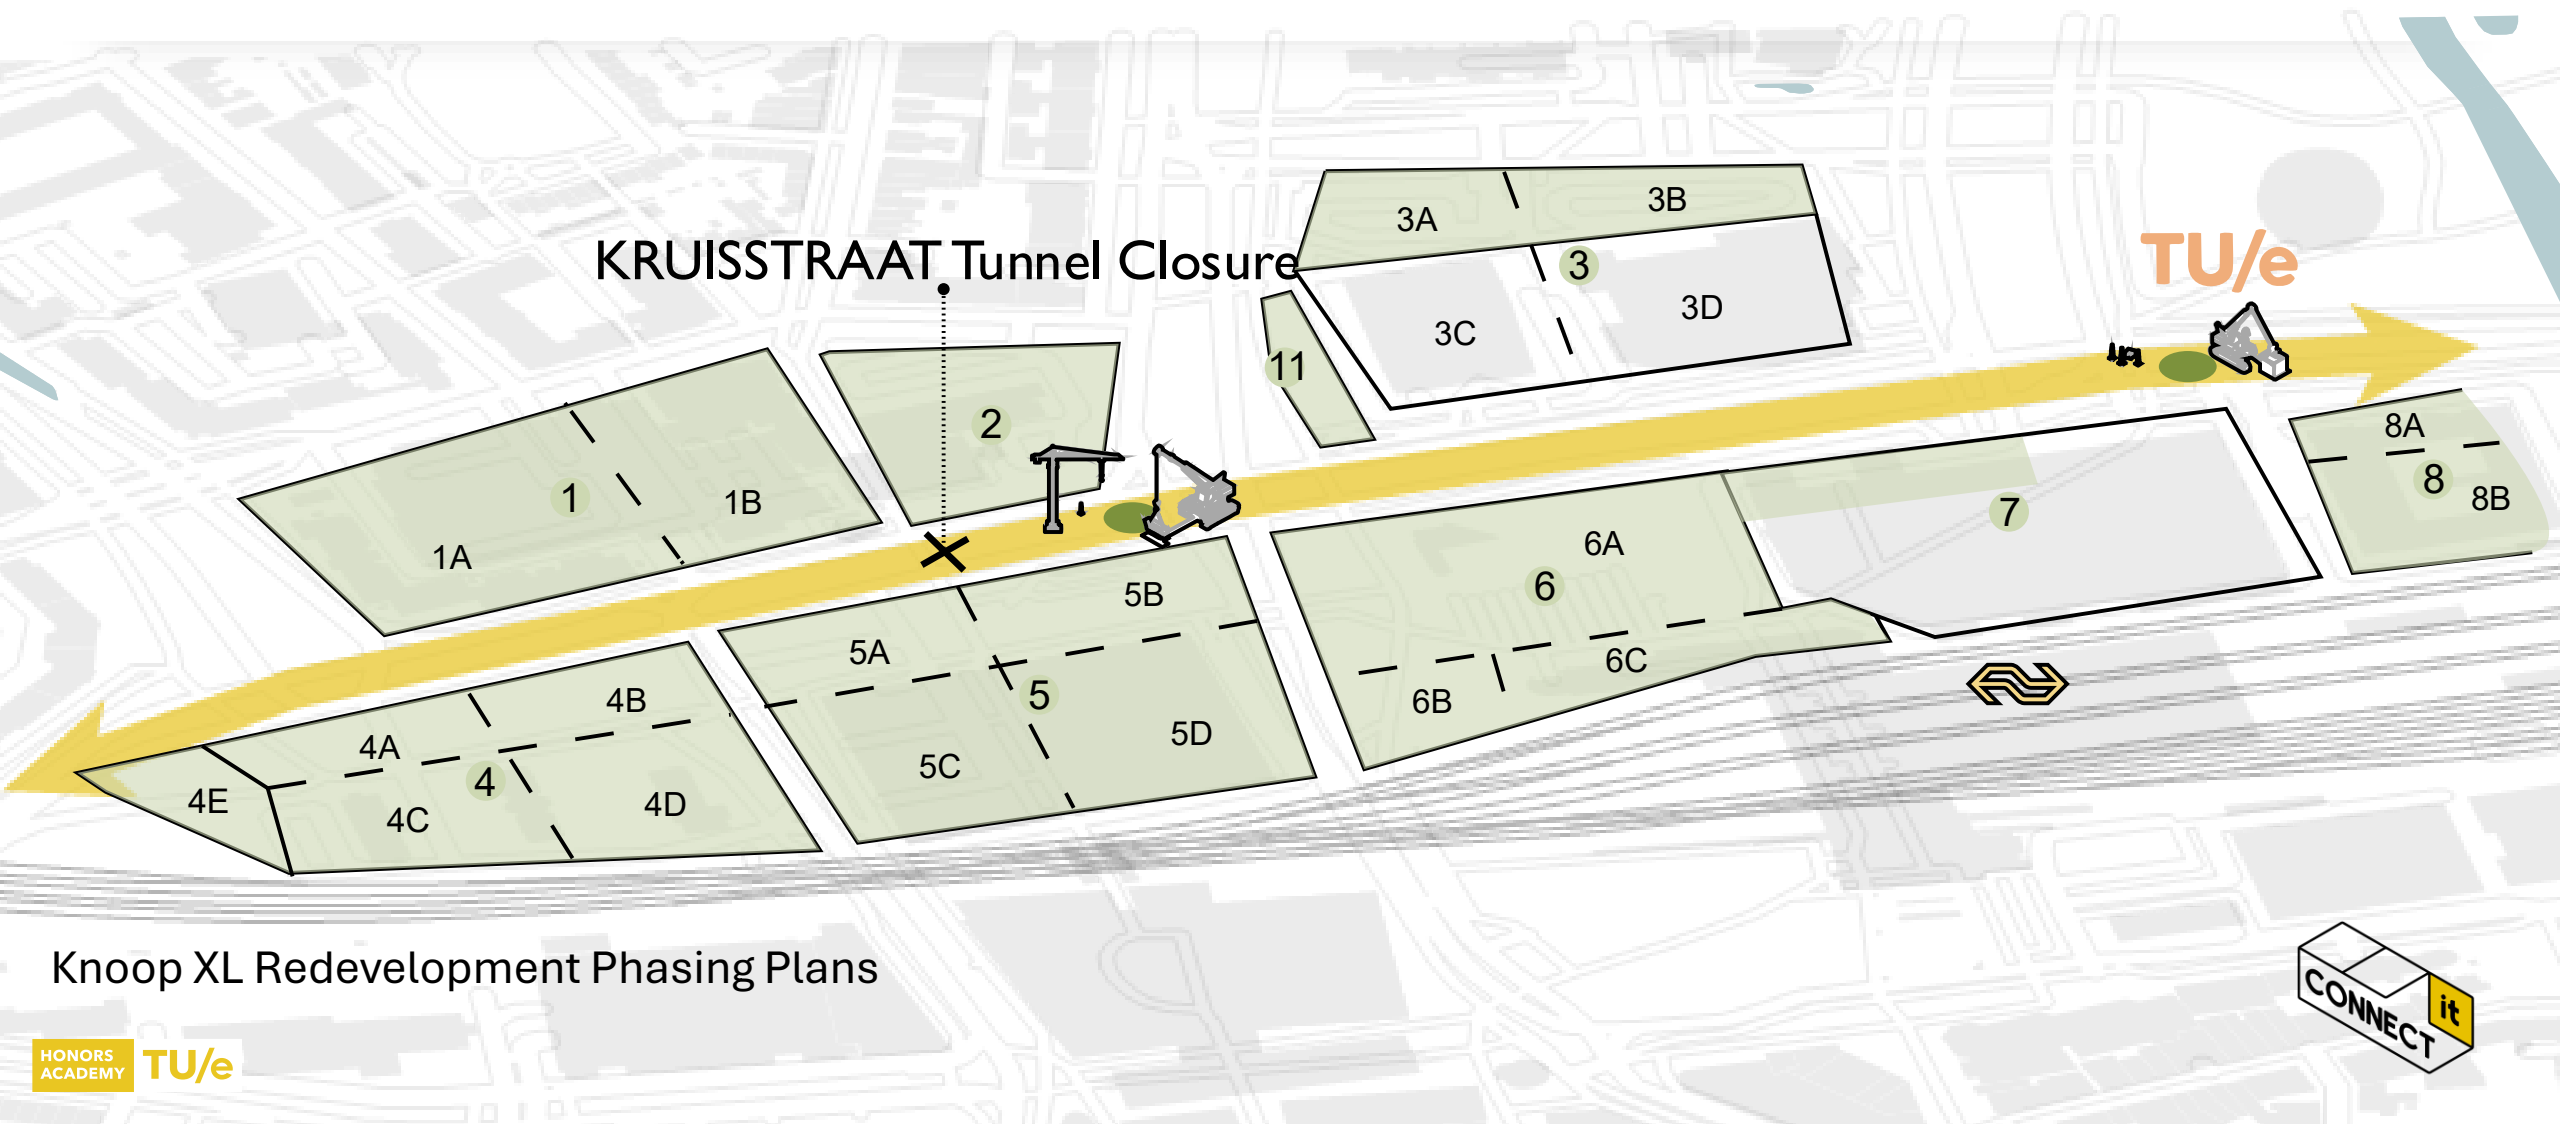

KnoopXL: Major
Transformation in the
next 20-25 years.

Continuous
Construction

Long-term disruption in
Fellenoord Highway
zone

The Problem

Knoop XL Redevelopment Phasing Plans

A key connection disappears

- Kruisstraat tunnel closing
- $\pm 5,000$ pedestrians / $\pm 10,000$ cyclists daily
- Direct link between north and city centre lost

Impact:

- Longer routes
- Unsafe mixing with traffic
- Reduced accessibility

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

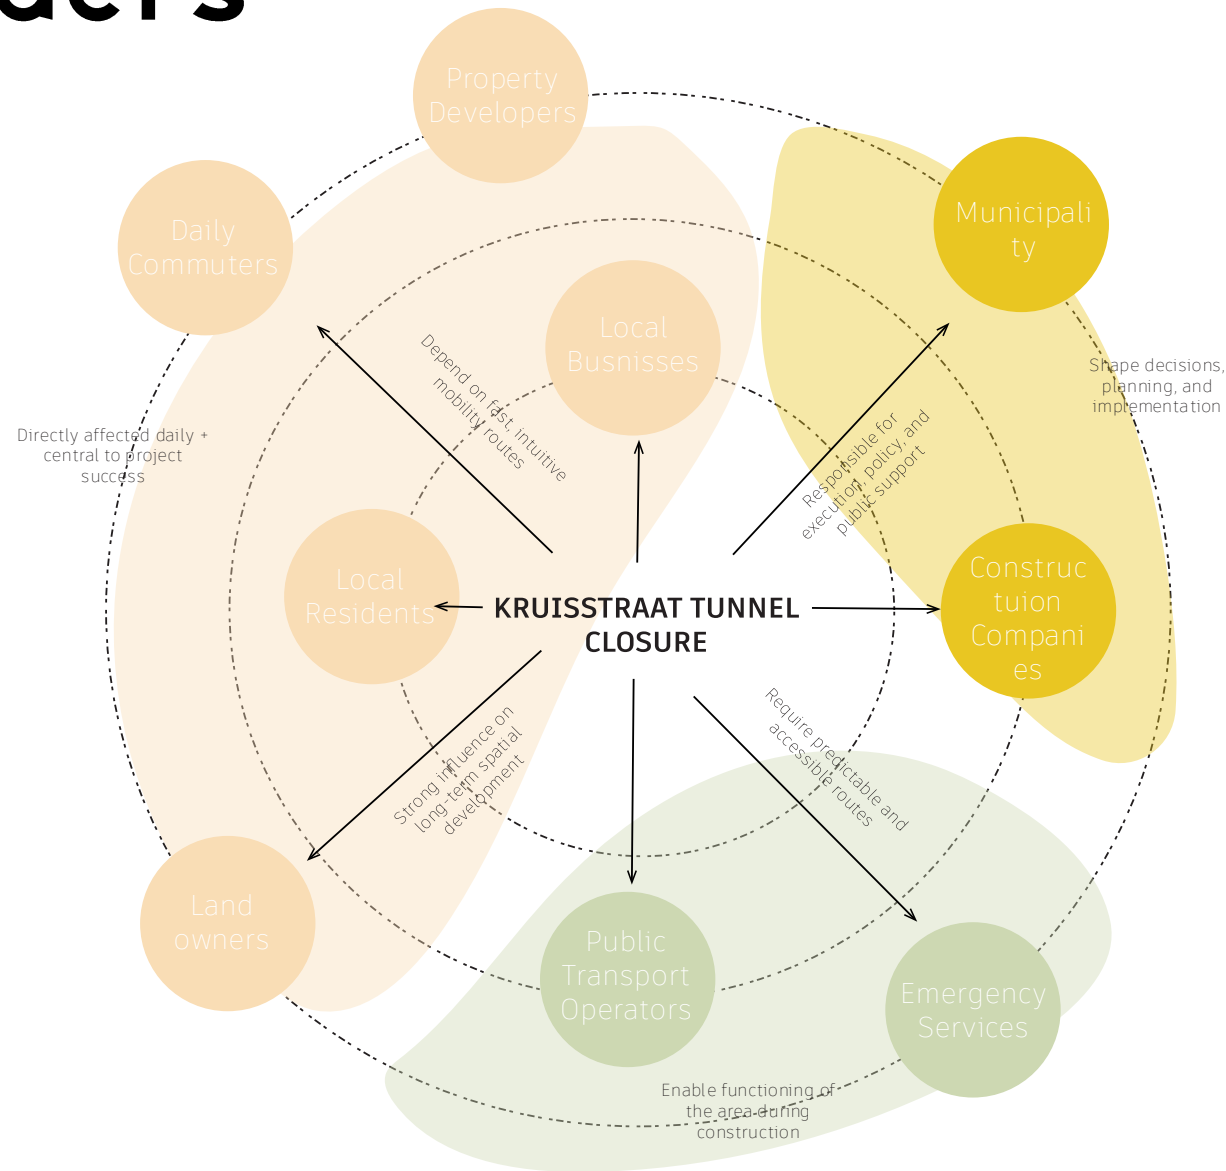

11 SUSTAINABLE CITIES AND COMMUNITIES

The Bigger Impact

- **It's not just mobility — it's city life**
- 372+ small businesses affected
- Residents lose daily convenience
- Area becomes less attractive
- **People will live in construction for years not just weeks**

Stakeholders

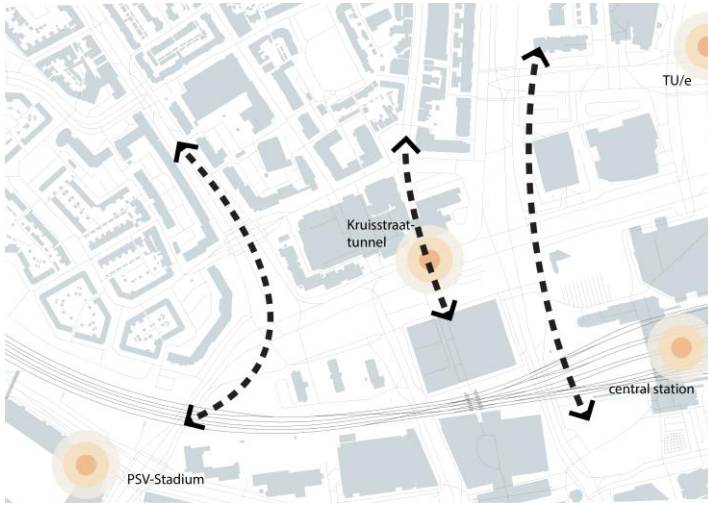

Our vision

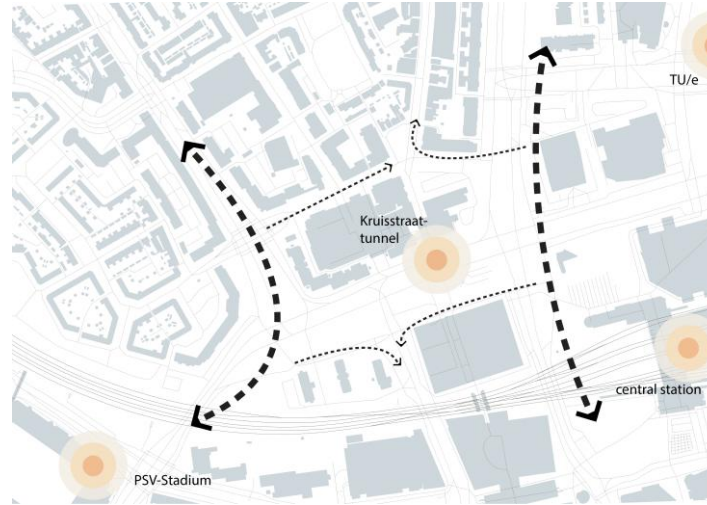

**Don't just reroute people,
keep them connected**

*Transform this opportunity
into something people will
miss when it's gone.*

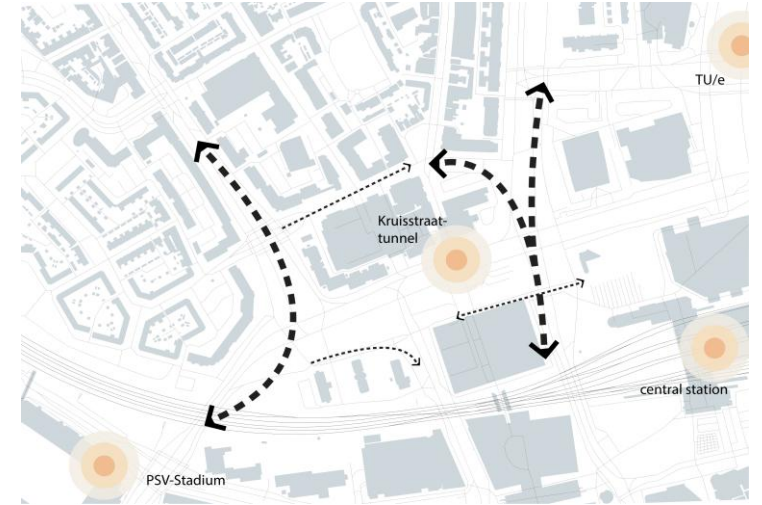

Situation Analysis

Current situation

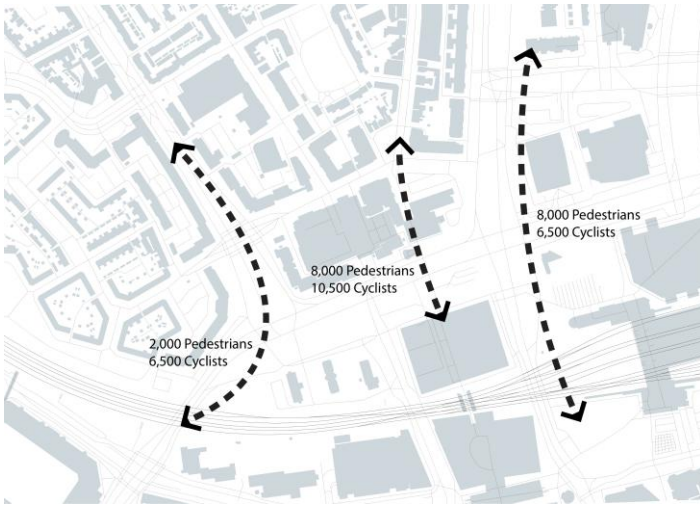

Planned situation

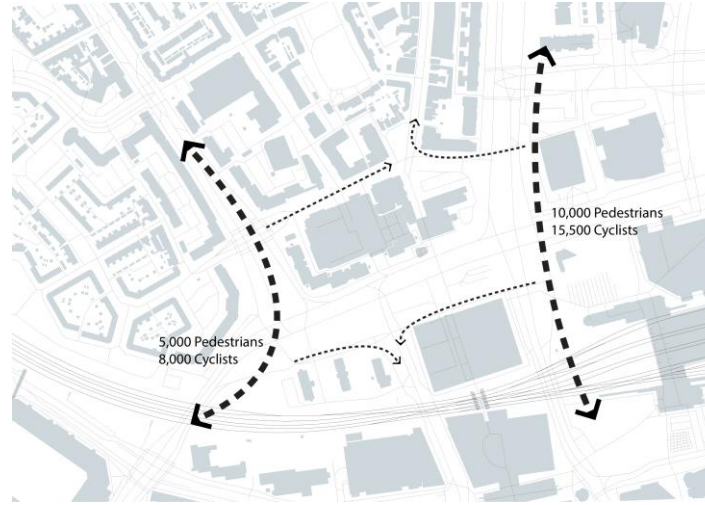

Bridge situation

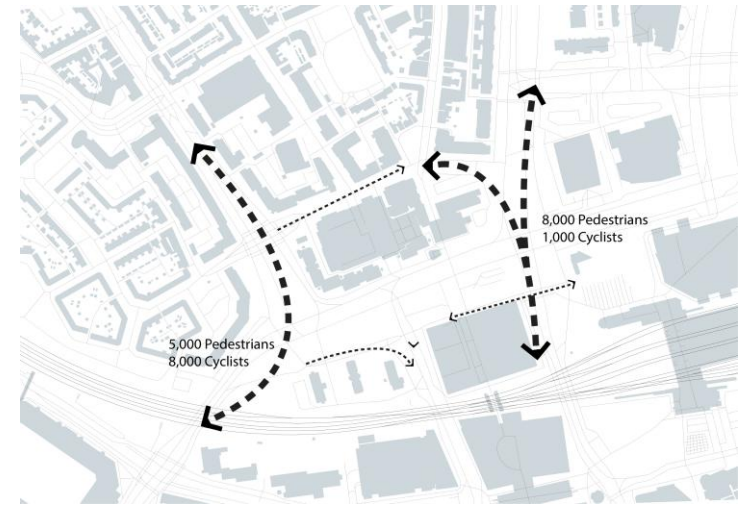

Pedestrian and Cyclist flows

Current situation

Planned situation

Bridge situation

Why not in Eindhoven?

- **USA** has it – New York High line
- **England** has it – London Bridge
- **China** has it – Huajiyang Canyon Bridge

Our solution

A Modular Bridge System

- Elevated crossing over construction
- 3 access points for flow & safety
- Designed for pedestrians + cyclists

Focus

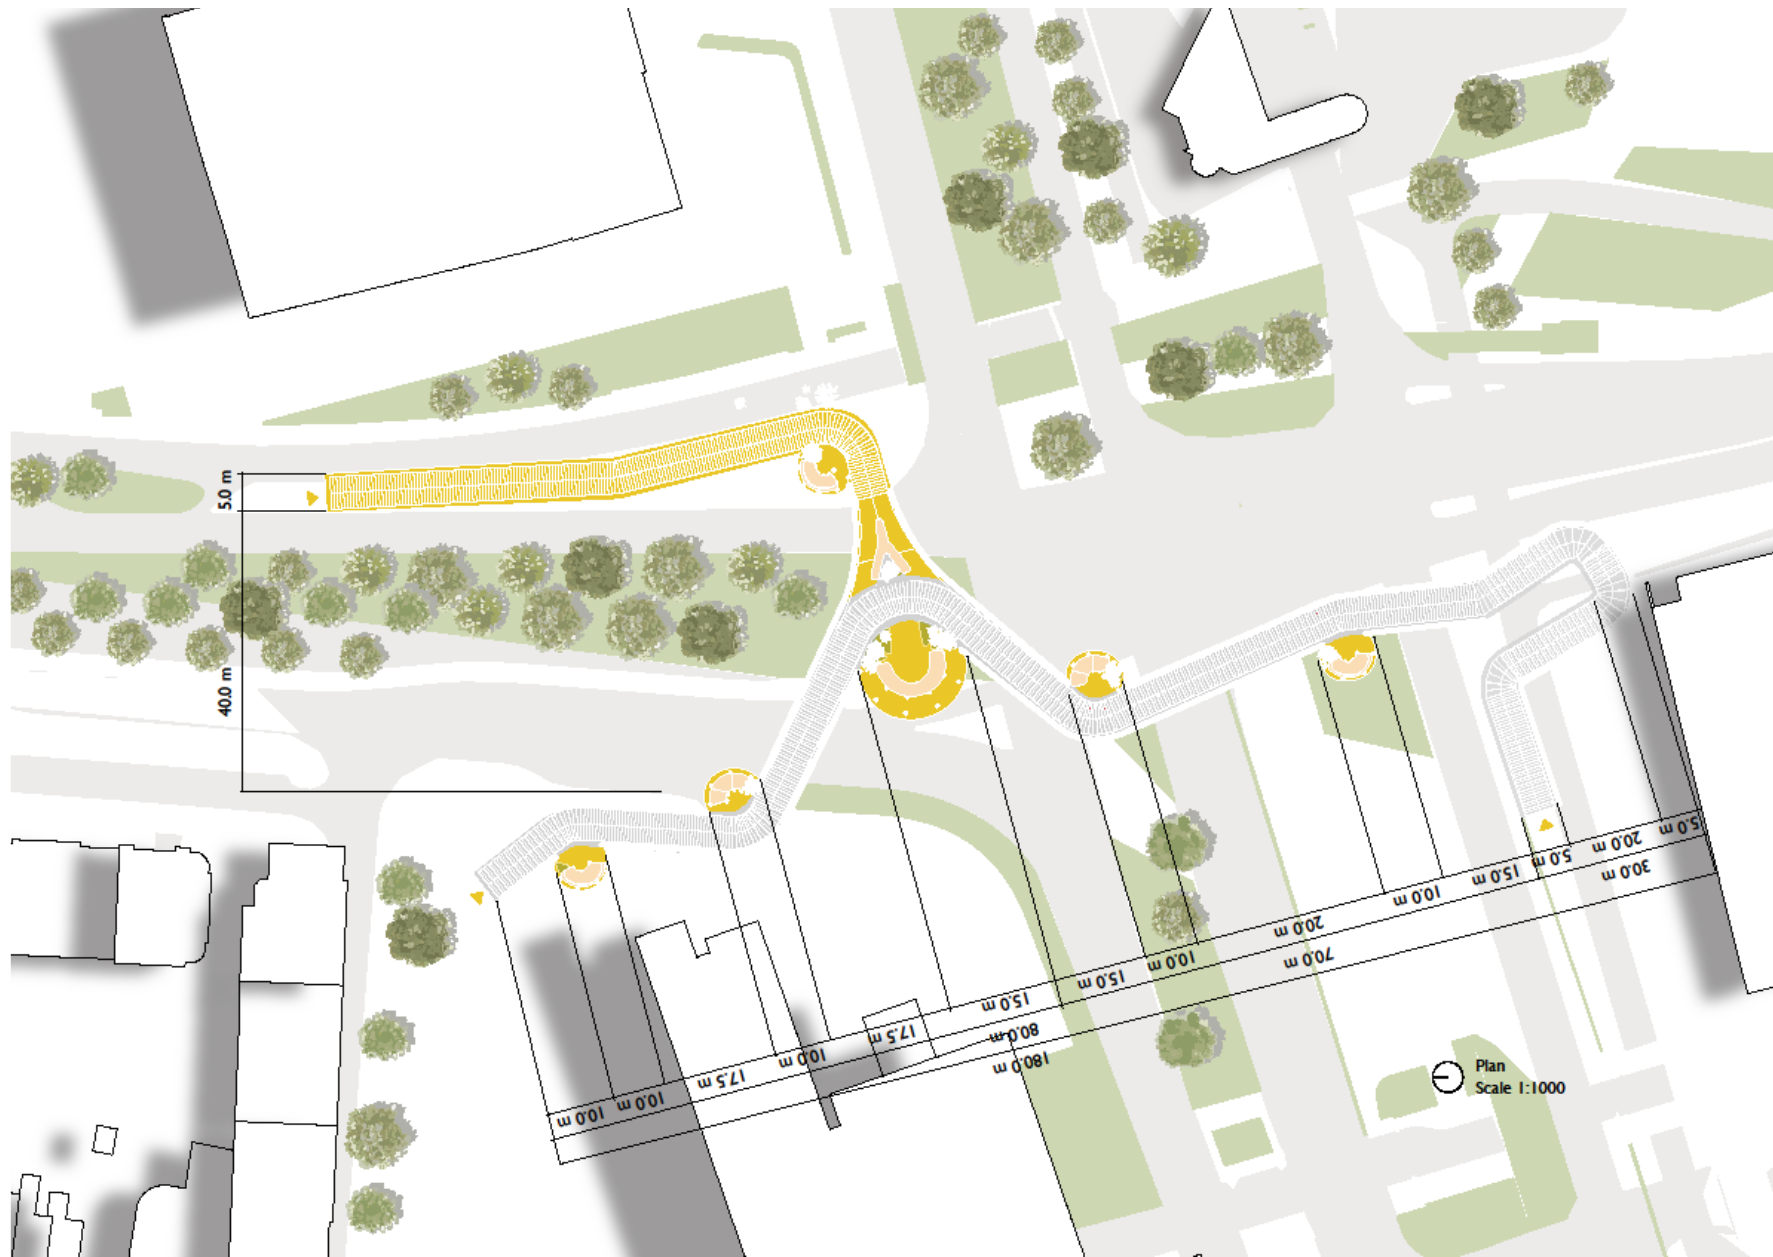

- Direct
- Safe
- Intuitive

Masterplan

Axonometric Scale: 1/2500

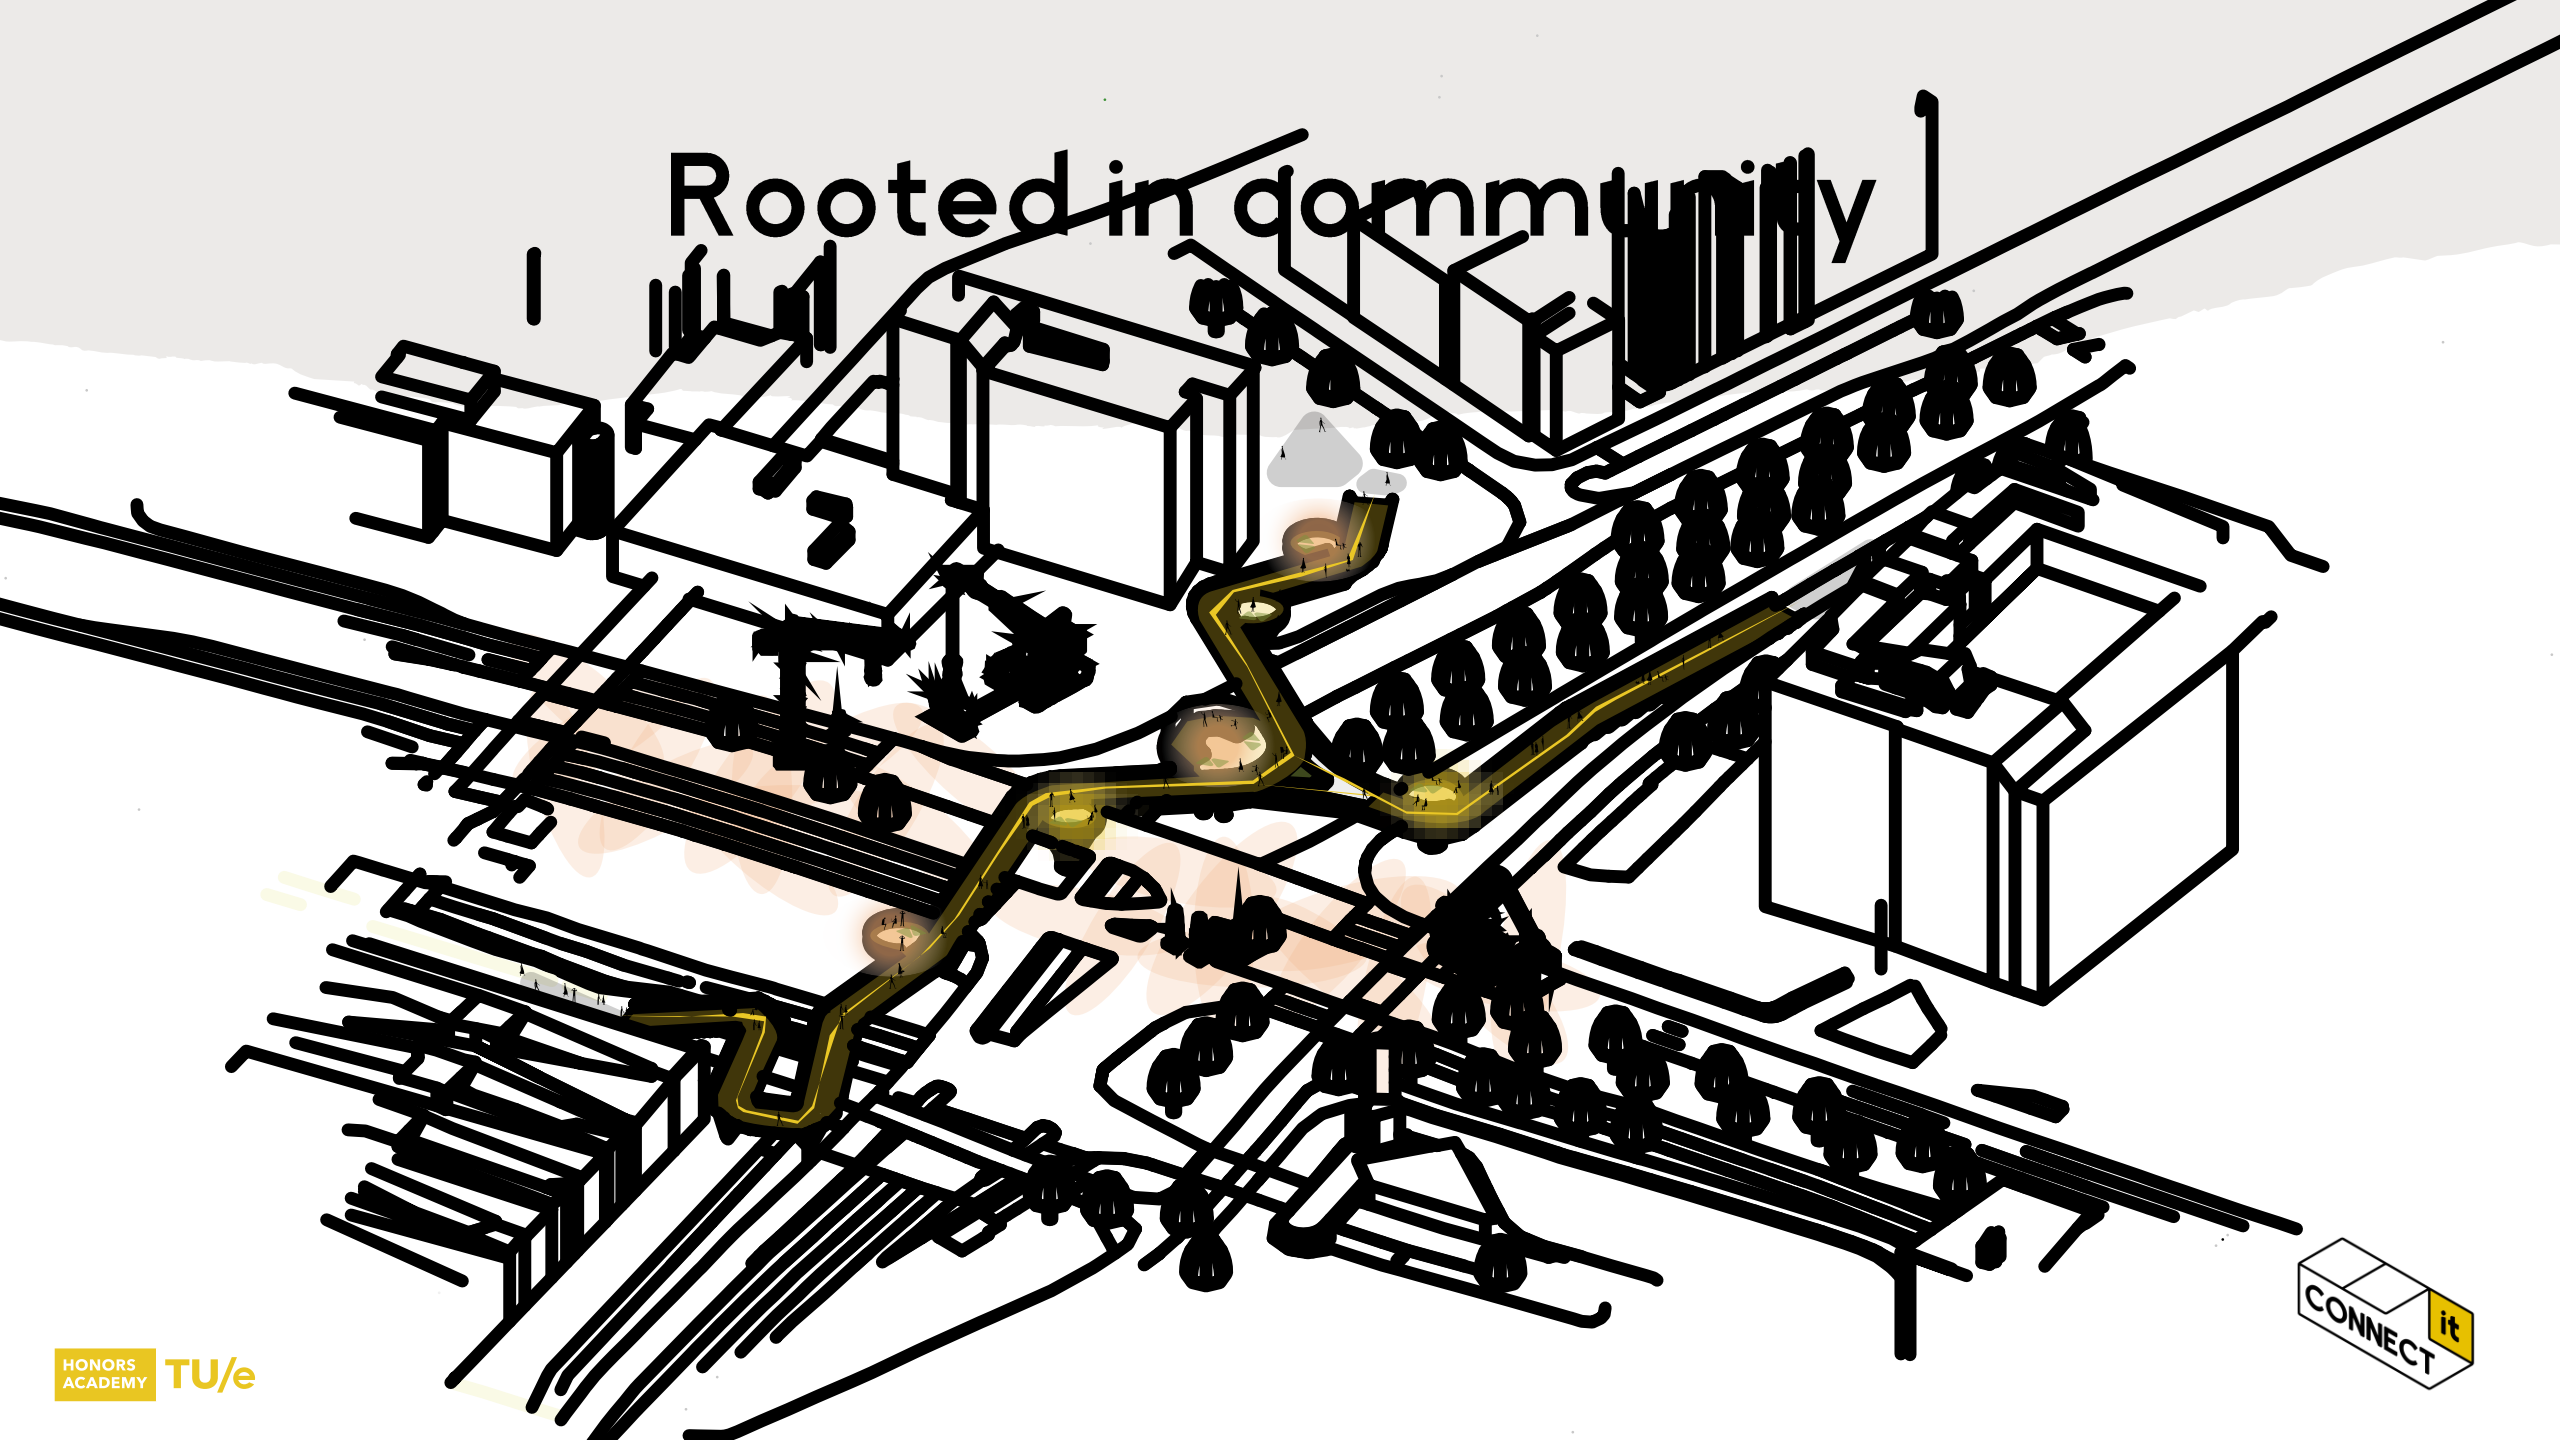

Elevation Detail
Scale 1:200

Rooted in community

More than a bridge

Social Value

Safety

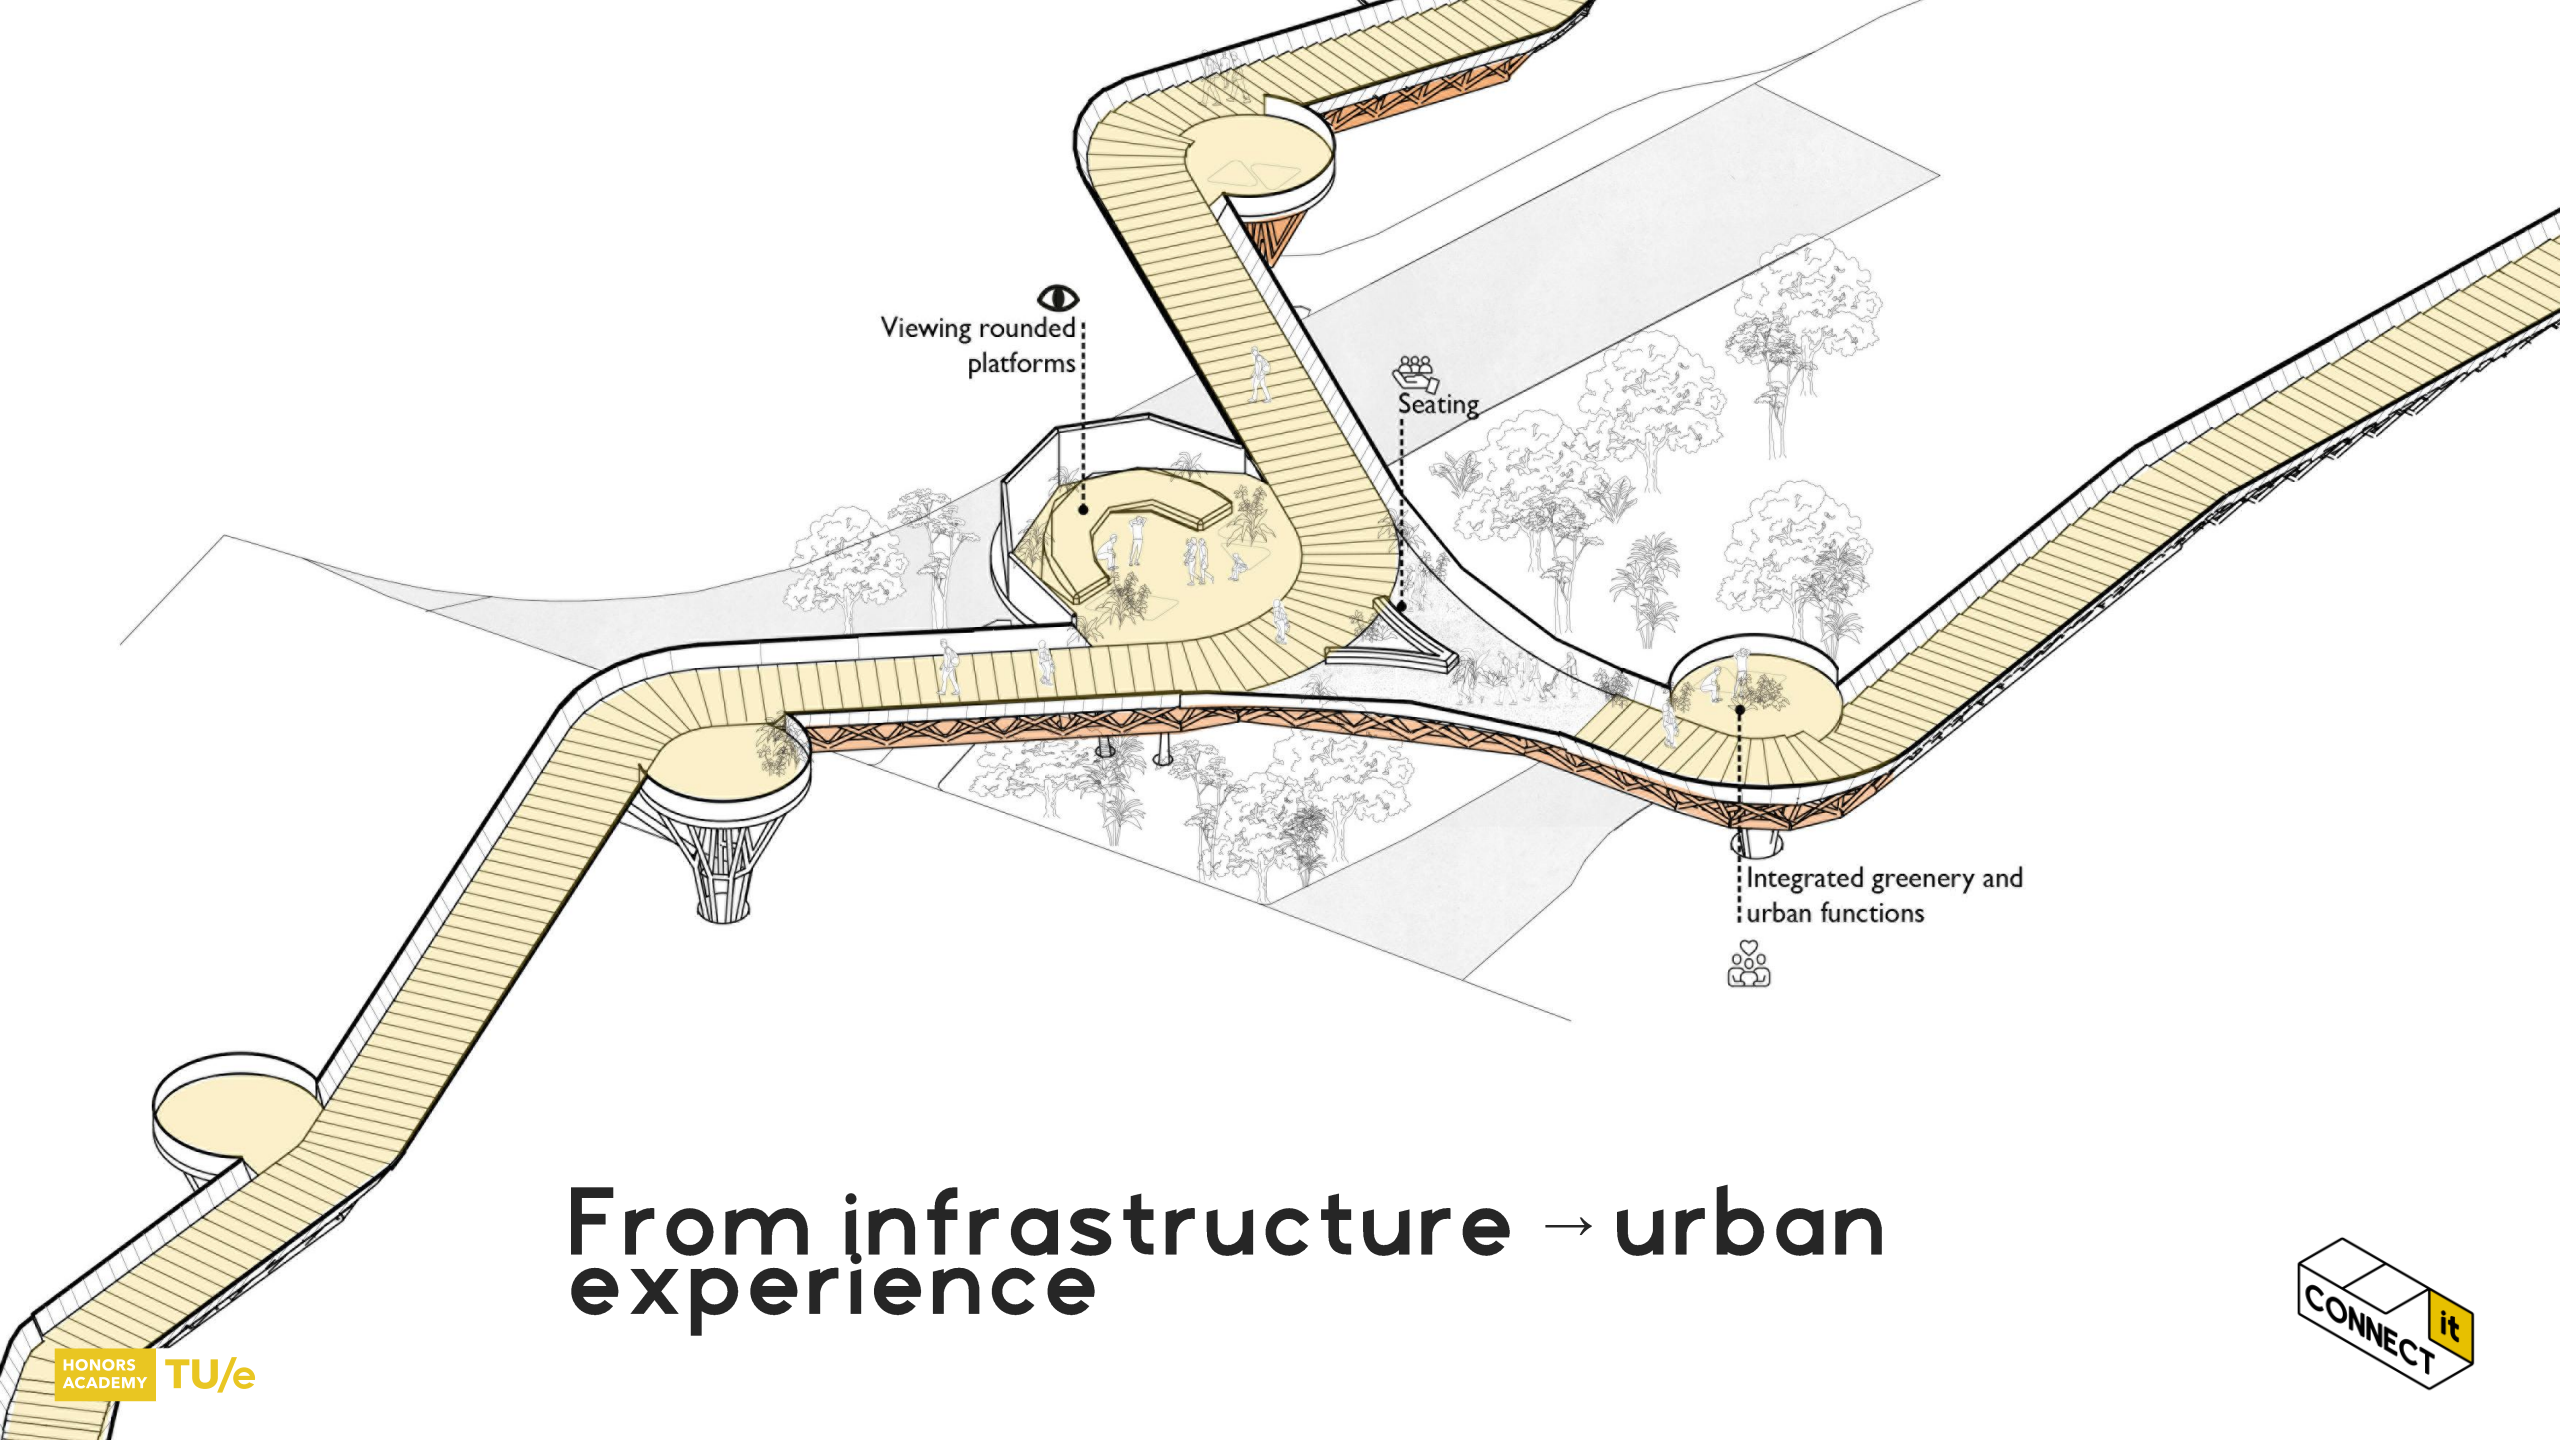

Attractiveness

- **From infrastructure → urban experience**
- Viewpoints over construction
- Social spaces (wider nodes)
- Identity for the area

We aim to:

Turn disruption into something people engage with

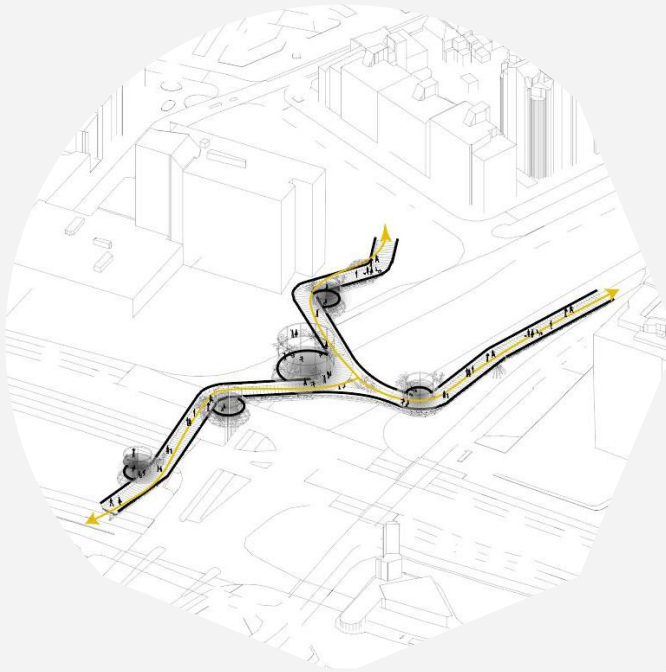

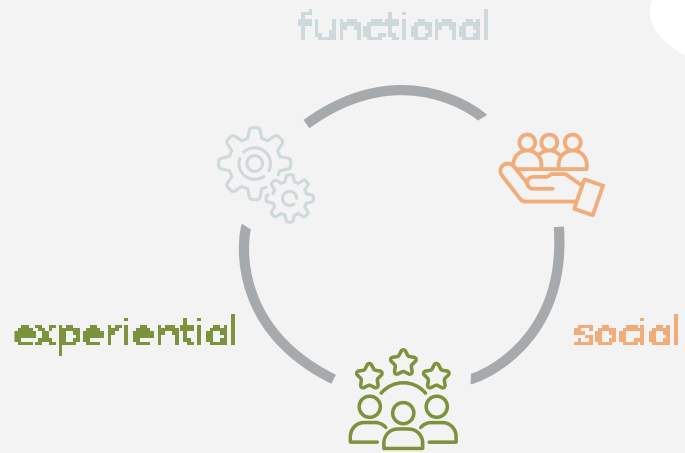

Viewing rounded
platforms

Seating

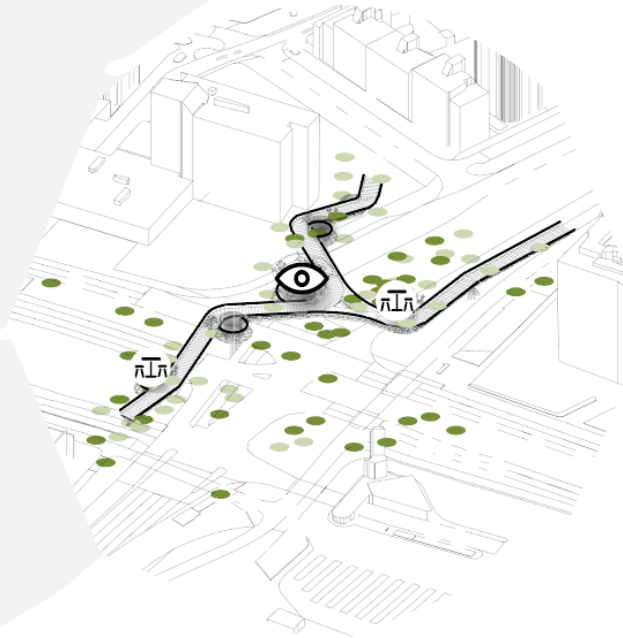

Integrated greenery and
urban functions

From infrastructure → urban
experience

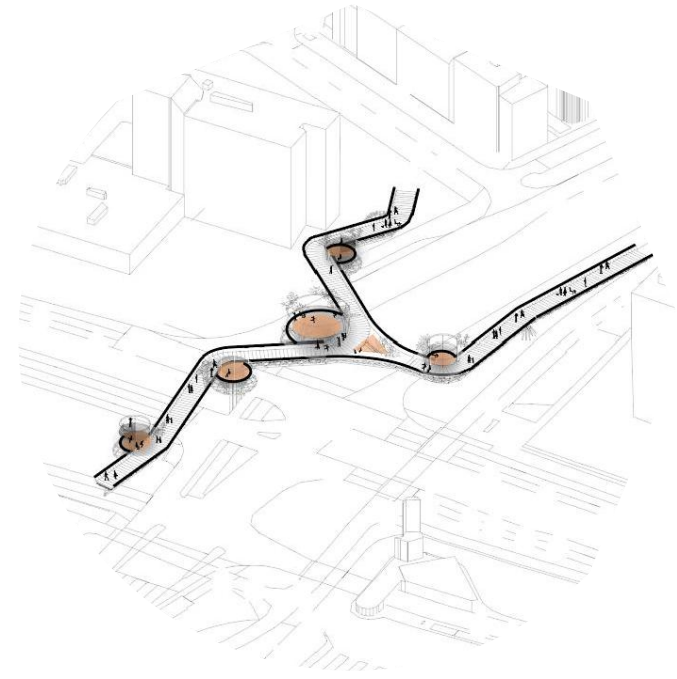

Why it works

Functional

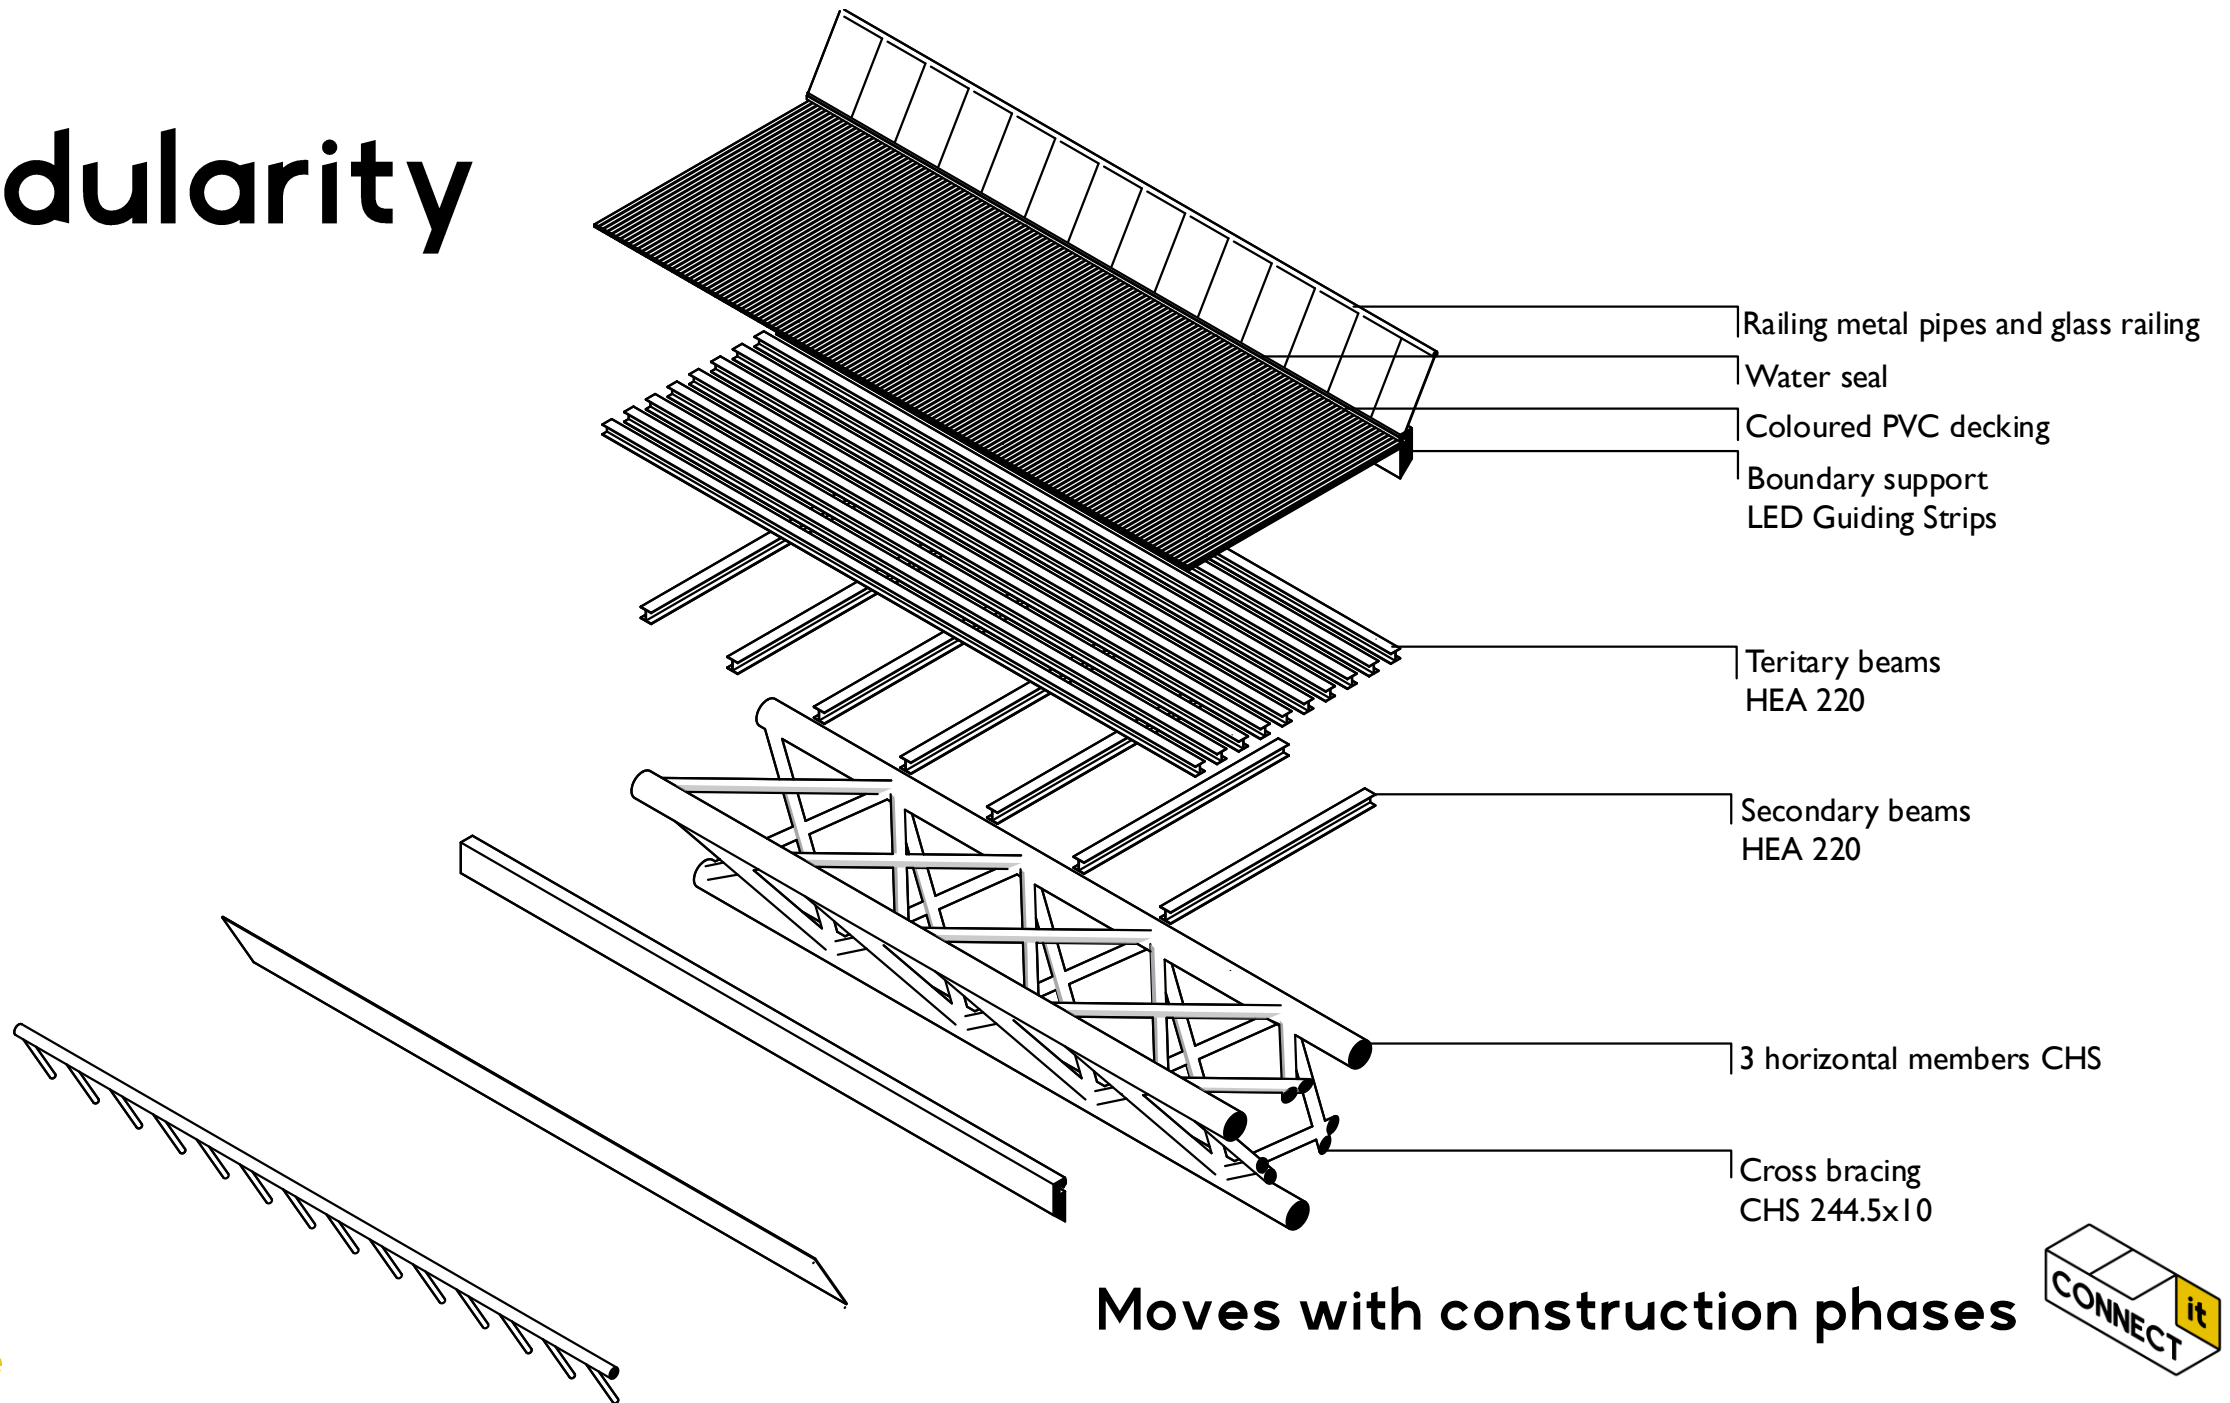

Experiential

Social

Modularity

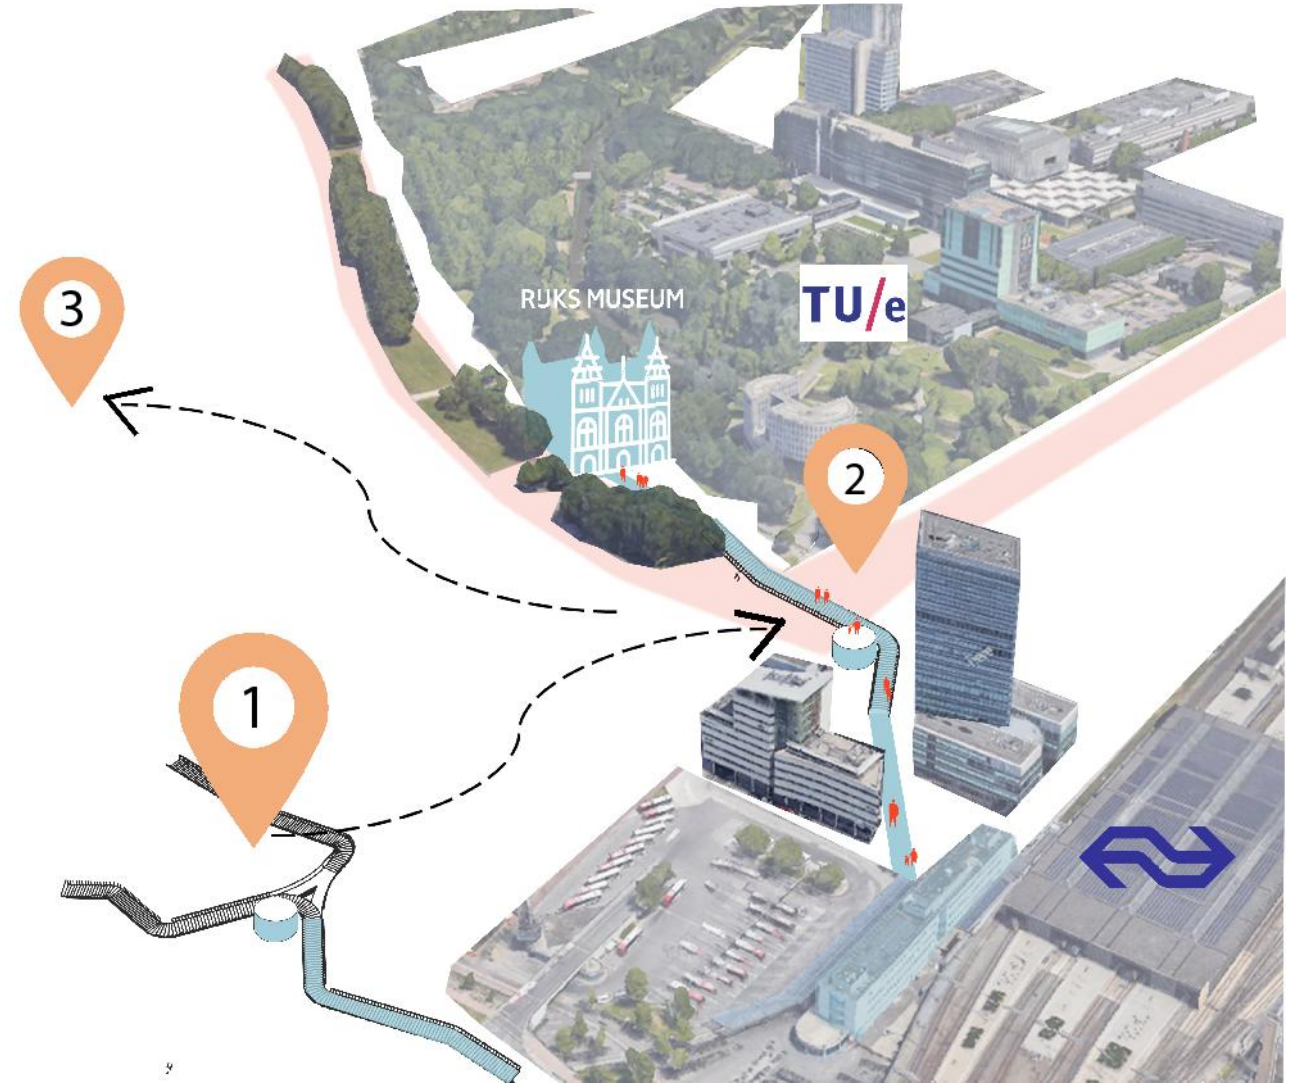

Moves with construction phases

Relocation keeps it moving

- Urban Integration
- Connection to city network
- Shows long-term value

Impact and Value

- Maintained accessibility
 - Support for 1000s of daily users
 - Boost to local economy
 - A social public space
-
- We offer value delivered over years for the cost that it takes to build it
 - Strengthens Eindhoven's identity

This is not a cost, it's a contribution to the city

Live in Eindhoven

**We don't just build a bridge
We support Eindhoven during transformation**

- Keeps the city moving
- Gives something back to citizens
- Turns construction into opportunity
-

Making construction part of the city, not a barrier to it

Any questions? 😊

Thankyou for your attention.
